SUMMARY OF THE REASONS FOR DECISION:

The CD-ROM (non-film) entitled *Extreme Heat* is classified as:
Objectionable except if the availability of the publication is restricted to persons who have attained the age of 18 years.

Extreme Heat contains 1295 image files which explicitly depict sexual activity and nudity. Some of these images depict sexual conduct of a degrading and dehumanising nature, and degrade and dehumanise some of the participants by focusing just on their genitals. The CD-ROM also exploits the nudity of young persons to a limited extent in three image files, which appear to present women as young persons. Because of the very limited extent of the depictions, the ambiguity of the women's age, and the fact that such image files are outweighed by the other material around them, these elements are not of greater concern. However, given the sexually explicit nature of the CD-ROM its availability is likely to be injurious to the public good unless restricted to an adult audience.
